

# ANGEL

## A New Approach to Hearing Protection

Protect your ears,  
preserve your health

## Features

---

Angel is a portable sound-level monitoring device that measures exposure and alerts you when preset thresholds are exceeded.

- Wear on your shoulder or place on your desk for continuous monitoring. When your user-defined thresholds are exceeded, audible and/or visual alerts prompt you to wear hearing protection or move away from the source.
- Sound-level detection with user-set thresholds
- Up to 20 hours battery life (rechargeable)
- Customizable alerts: visual and/or audible
- Data logging to PC for historical analysis and exposure visualization
- Charging base holds up to four modules
- USB cable and data-retrieval software included
- Dimensions (Angel module): 60 × 30 mm
- Dimensions (Charging base): 140 × 30 mm
- Power supply included
- 2-year warranty
